

Karolina Malesik JUNIOR INTERIOR DESIGNER

I am a graduate of Interior & Environmental Design at Duncan of Jordanstone College of Art & Design within Dundee University. What fascinates me the most about the spatial design is the relationship which people develop with a space, the mechanisms that condition the way we perceive the environment around us, and how varied forms of a built environment can influence human behaviour. I love learning and facing new challenges. I consider myself to be reliable, hard-working, and ambitious individual who actively listens and pays extreme attention to detail. My BA in Interior & Environmental Design for which I received a First has contributed to my confidence in using Adobe software as well as SketchUp and 3dsMax. "Farm on the Roost"- my thesis design of an urban/social farm, was shortlisted in London's New Designers in the Moo Design Identity Award. I have a unique style, sense of composition and creativity. I believe I work well as part of a team and am solution oriented under pressure. I also value a kind atmosphere where people support each other.
